WRID-Henry-St-presentation-June-202...

The screenshot displays a web interface for a project inventory system. The main content area shows a project titled 'White River Innovation District'. Under the 'Project Summary' section, there is a text box describing the project's goal: 'Infrastructure to support redevelopment of the former GM stamping plant, including the Henry Street Bridge, Cultural Trail extension, additional roadway and bike/ped infrastructure, and stormwater and green infrastructure.' Below this, there is an 'Images & Documents' section with an 'Attach file' button. Four image thumbnails are displayed in a 2x2 grid, showing architectural renderings of the project's infrastructure, including bridges and walkways. The thumbnails are labeled with their respective file names: 'WRID-Henry-St-presentation-June-202...', 'Deck_West_Updated_Rings_2024-05-26...', 'Aerial_Updated_Rings_2024-05-26.jpg', and 'WRID-Henry-St-presentation-June-202...'. The interface also features a top navigation bar with 'Data', 'Automations', 'Interfaces', and 'Forms', and a secondary navigation bar with 'Components', 'Communities', 'Project Owner', 'Project Status', 'Categories', 'Guiding Principles', 'Project Need', and 'Investment Type'.
